**Project Overview**
- Develop an undergraduate website for iSchool.
- Program launched for first time in Fall 2016.
- Technology used: Drupal.

**Purpose of the Website**
- Provide information to potential students.
- Marketing, Branding and Recruitment tool.
- Communicate information to a large audience.

**Skills gained from the Project**
- Learned Drupal.
- Front end development skills.
- Deeper understanding of web development.

**Future Enhancements**
- Add dynamic contents.
- Make website more interactive.
- Make website compatible for hand-held devices

**Successes of the Project**
- Major Success: The iSchool undergraduate website is now live.
- Responsive web design.
- Met timeline for the project.

**Challenges Faced**
- Managing deadlines.
- Finding right pictures for the front end.
- Identifying right color combination for a web-block.
