Introduction
The U.S. Holocaust Memorial Museum: A History Unfolded is a crowdsourced ‘citizen history’ campaign.

Project Background
Two parts: Website database and Future 2018 Exhibition
- Website access is available for:
  - Information collection
  - Metadata contribution for events
  - Interaction with the data
- Exhibition will highlight:
  - Document search provided by data visualizations
  - Compare current assumptions with actual public opinion polls
  - Draw new conclusions on what American citizens knew about events leading up to and during the Holocaust in 1933-1945

Objective
Design Visualizations for 3 Audiences:
- American High School Students
- Local Librarians and Researchers
- US Holocaust Memorial Museum Staff

Methodology
- Cleaned and analyzed historical newspaper metadata
- Evaluated media usage and created a series of infographics for the client website

Successes:
- Visualization Autonomy
- Client willingness to explore new programs
- Visualizations inspired new ideas for the client exhibition

Challenges:
- Working on different timelines: May 2016 versus April 2018
- Project scope creep due to new information
- Communication on action items

Accomplishments:
- Provided Recommendations to integrate visualization programs in future work
- Created 20 visualizations for segmented audiences
